**AMENDMENT UNDER 37 C.F.R. §1.111**

Sir:

In response to the Office Action dated March 20, 2003, please amend the above-identified application as follows:

**IN THE CLAIMS:**

**Please amend the claims as follows:**

- 
- 1 1. (Amended) An active matrix type liquid crystal display device, comprising:  
2 a thin film transistor (TFT) substrate having a common wiring and a source/drain  
3 wiring formed on a first substrate, said first substrate being provided with:  
4 an insulating film covering said common wiring and said source/drain wiring,  
5 said insulating film being coated with a first alignment layer;  
6 an opposite substrate, opposing said TFT substrate, having a second alignment  
7 layer formed on a second substrate;  
8 a liquid crystal held between said first alignment layer and said second  
9 alignment layer; and  
10 a common electrode and a pixel electrode wired in parallel with each other and  
11 being formed as parts of said common wiring and said source/drain wiring,  
12 respectively, so that an angle made between a direction in which said first alignment
